Re: Change of Illumina DNA Library Preparation Kit for Next Generation Sequencing

Dear valued customers,

Thank you for your usual order of our products and services.

Please be informed that due to the sales termination of "TruSeq DNA Sample Prep Kits", library preparation for the Illumina next generation sequencing service will be provided using the subsequent item, "TruSeq Nano DNA sample Prep Kits". We apologize for any inconveniences so caused. Thank you for your continued support.

Sincerely,

- Object service: Next generation sequencing Illumina HiSeq/MiSeq
- Object sample: DNA sample
- Required sample amount (DNA sample):
 - For the present kit ("TruSeq DNA Sample Prep Kits"): 3 μ g
 - For the new kit ("TruSeq Nano DNA sample Prep Kits"): 1 μ g
- If you require the sequencing service using the "TruSeq DNA Sample Prep Kits", please contact us by December 19th, 2013 to our e-mail address, hss-ngs@hssnet.co.jp
- For the specification of the "TruSeq Nano DNA Sample Prep Kits", please refer to the below web site;
<http://www.illumina.com/products/truseq-nano-dna-sample-prep-kit.ilmn>
- * "TruSeq DNA PCR-Free Sample Prep Kit" is also available for the subsequent series. If you require any information, please inquire.
- For more details, please inquire to
 - HSS Sales team or Next generation sequencing team
 - Telephone: 0120-613-190 (toll free) 011-768-5903
 - Mail: hss-ngs@hssnet.co.jp
