Re: A new manufacturing facility established

Dear valued customers,

We are deeply sorry for the sufferers of Tohoku district-off the Pacific Ocean Earthquake and pray for the earliest possible restoration and reconstruction of the quake-hit areas.

Since the earthquake, we have considered about the future stable production & supply system as well as business development in Tokyo areas, and decided to transfer the manufacturing function from Tsukuba research center to the facility newly established as below.

We will take this opportunity to improve production efficiency and service quality to fully satisfy our customers' expectation, and hope all of our customers may keep continuous good relationship with us.

Sincerely yours,
Yukio Mizutani, CEO

<FACILITY INFORMATION>
