

Greetings from CEO

We are pleased to inform that Hokkaido System Science Co., Ltd. celebrates its 30th year in business as of September 1st, 2018.

I sincerely appreciate your warm supports and continued business with us.

When we were born in 1988, it was still in the early days of biotechnology industry. Starting from the deal of laboratory devices, we have made efforts to build a reliable system and businesses including our current core businesses such as oligonucleotide synthesis and next generation sequencing services to meet customers' various requirements.

For the future, we will fully utilize our cultivated technologies to improve our new service line-ups such as the nucleic acid medicine businesses and the genetic testing services toward precision medicine.

We shall remind ourselves of our basic policy "customers first", trying to make the company full of dreams and hopes, and further endeavor to offer our customers finer services than ever.

September, 2018

Yukio Mizutani

CEO

Hokkaido System Science Co., Ltd.
